

ADVANCED DETECTION SYSTEMS®

PROSCAN CONVEYOR SYSTEMS

QUALITY CONVEYORS FOR WASHDOWN APPLICATIONS

Intralox® 1100 Series
Modular conveyor belt

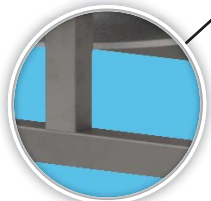

Chain Drive
Stainless steel

Washdown Motor
Totally enclosed and fan cooled. Stainless steel shaft and coated aluminum gear reducer

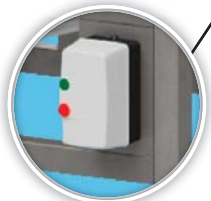

Quality Construction
Bead blasted stainless steel welded construction

Optional Detect Alert Beacon
Visual light and audible horn

Tubular Frame
Heavy duty construction, long-term integrity

Motor Starter
Watertight and corrosion resistant

Stainless Steel Ball Bearings
Situated inside polymer housing

Articulated Rubber Feet
Optional casters are available

Optional Reject Systems
Designed exactly for your application needs

FEATURES & BENEFITS OF CONVEYORS FOR WASHDOWN APPLICATIONS

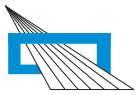

- Stainless steel components are corrosion-resistant and designed to provide many years of reliable performance
- Heavy Duty welded construction and minimal maintenance conveyors ensure long term integrity
- Available in the length and belt width required for your specific application

AUTOMATIC REJECT DEVICES

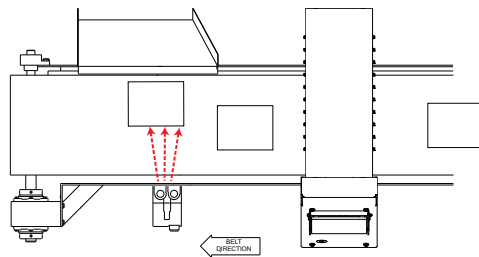

SWEEP ARM

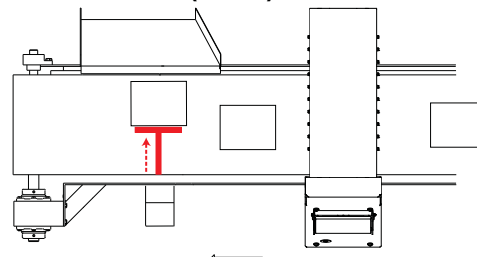

DIVERT ARM

AIR BLAST

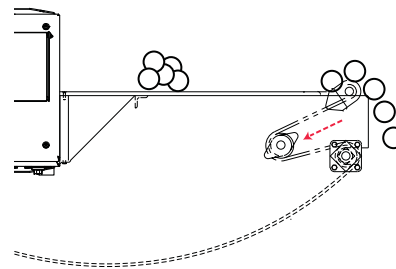

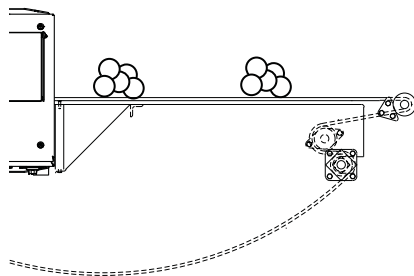

PUSH ARM (RAM)

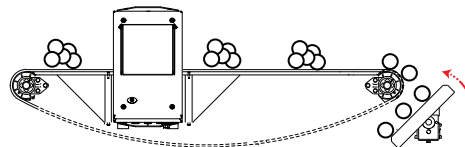

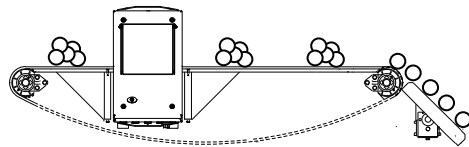

Push arm also available in alternate side design.

RETRACTING PULLEY

FLOP GATE

THE ADVANCED DETECTION SYSTEMS DIFFERENCE

With over 30 years of innovation and experience in metal detection, Advanced Detection Systems has been expertly providing unique solutions for the food processing and packaging industry. Advanced Detection Systems is well known for our expert approach to customer service. With engineering, sales, manufacturing, testing and service centralized in one facility - we are able to offer our customers a personal, friendly and informative experience. We promptly respond to our customer's needs by designing and building quality metal detection systems, delivered when promised.
