Advanced Detection Systems Helps Protect Freeport-McMoRan, Inc. Mining Operations

When Phelps Dodge (now known as Freeport-McMoRan, Inc.) needed help protecting the expensive crushers at their Morenci and Safford, AZ operations – they turned to Advanced Detection Systems for assistance. Over the past several years, 28 metal detectors have been sold to Freeport-McMoRan, Inc. for their copper mining operations.

These rugged Model 9000 detectors range in size from 24" x 48" up to a whopping 36" x 102"! Freeport-McMoRan, Inc. appreciates the heavy duty construction which can withstand the pounding a mining operation can dish out. Advanced Detection Systems has also constructed several of these detectors entirely out of stainless steel for additional corrosion protection.

Contact Advanced Detection Systems today to protect your expensive processing equipment!
