## ProScan Max® III Product Spotlight

The ProScan Max® III metal detector with enhanced detection levels and user interface simplifies food processor's quality control documentation. Advanced Detection Systems' focus on today's stringent food safety regulations is reflected in several of the ProScan Max® III standard features, including: administrator assigned user names and log-in levels allowing users to abide by identity requirements, data logger access through a downloadable thumb drive, running list of recent detection history visible from the menu and flexible automatic reject timing to ensure a reliable detect and reject process. Food processors are encouraged to use Advanced Detection Systems' free product testing service as a perfect way to learn how the ProScan Max® III can be used to improve their metal detection investment. Advanced Detection Systems, an engineered driven company will test your product; guarantee ProScan Max® III detection levels and build the ProScan Max® III for optimum performance and reliability given the unique characteristics of your specific product.
