## **SurroundScan Protector LP Product Spotlight** **Aggregate, Mining and Recycling Applications Low-Profile Metal Detector**

"Low-Profile, Durable and Reliable"

Advanced Detection Systems' SurroundScan Protector LP is a new heavy duty, industrial grade metal detection system that detects ferrous, non-ferrous and stainless steel metal contaminants. The Protector LP offers the same core technology as the proven Protector HD. The only difference is in dimension and weight reduction that simplify installation on portable conveyors. When equipped with a metal marker and splice sensor installed on a spliced belt conveyor, The Protector LP defends your processing equipment (crushers, shredders, granulators, etc.) from damage and down time caused by tramp metals.
